ABOUT ME

I am a highly motivated **Software Engineer** specializing in **Java Full-Stack Development** with over 3 years of experience in building and delivering scalable, high-performance web applications from scratch. My expertise lies in backend development using **Spring Boot** and frontend development with **Angular**, ensuring seamless integration and an exceptional user experience.

I am proficient in **DevOps tools and practices**, including **Docker**, **Maven**, and **GitLab**, to streamline development, automate builds, and manage CI/CD pipelines efficiently. With a strong foundation in software design and a passion for creating innovative solutions, I thrive in collaborative environments and enjoy solving complex challenges to deliver impactful results.

WORK EXPERIENCE

Cynalys – Bizerte, Tunisia

City: Bizerte | **Country:** Tunisia | **Website:** <https://doctolys.com> | **Business or sector:** Information and communication

Fullstack Developer Java / Angular

[01/01/2023 – 01/11/2025]

Mission: Development of a Healthcare Telemedicine Platform(doctolys)

Context: Design and development of a SaaS telemedicine platform connecting patients and healthcare professionals internationally.

Period: 2022 - Present

Technical Stack:

- **Backend:** Java 11+, Spring Boot, Secure REST APIs, Microservices
- **Frontend:** Angular 17, TypeScript, RxJS, NgRx
- **Databases:** PostgreSQL, MongoDB, Elasticsearch
- **Tools:** Docker, GitLab CI/CD, Kubernetes, HL7 FHIR

Responsibilities and Achievements:

Backend Development:

- **Architected and developed a large, complex, and secure SaaS platform** from the ground up, utilizing **Java** and **Spring Boot** within a **microservices architecture** to connect patients and healthcare professionals internationally.
- Designed and developed HIPAA-compliant REST APIs for patient data management
- Implemented microservices architecture for appointment scheduling and electronic health records (EHR)
- Integrated medical device data streams and real-time health monitoring
- Reduced API response time by 40% through query optimization and caching strategies

Healthcare Frontend Development:

- Developed responsive Angular interfaces for patient portals and doctor dashboards
- Implemented real-time features for video consultations and medical chat
- Created accessible UI components meeting WCAG 2.1 healthcare accessibility standards
- Enhanced application performance, reducing load time from 4.2s to 1.8s

Healthcare Data Security & Compliance:

- Implemented end-to-end encryption for protected health information (PHI)
- Ensured GDPR and HIPAA compliance across all data processing activities
- Developed audit trails and access control systems for sensitive medical data
- Integrated with healthcare standards (FHIR, HL7) for medical data exchange

DevOps & Quality Assurance:

- Containerized applications using Docker and orchestrated with Kubernetes
- Implemented CI/CD pipelines with automated security scanning
- Conducted thorough testing including penetration testing and compliance audits
- Maintained 99.9% platform availability with comprehensive monitoring
- Improved system **observability** by implementing monitoring and logging solutions for better troubleshooting and performance tracking.
- Played a key role in the **end-to-end DevSecOps cycle**, contributing to CI/CD pipelines, containerization with Docker

IA:

- **Pioneered the integration of AI for predictive analytics** by implementing **OpenAI APIs** to assist in preliminary symptom analysis and patient triage, enhancing clinical decision-support tools.

Security & API Management

- Secured the application by implementing **JWT-based authentication** and **OAuth 2.0** authorization protocols.
- Established **role-based access control (RBAC)** to precisely restrict application functionality and data access based on user roles.
- Documented all backend APIs comprehensively using **Swagger (OpenAPI)**, facilitating clear communication between frontend and backend teams and simplifying API testing.

Key Results:

- ✓ Platform deployed across 3 countries serving 50,000+ patients
- ✓ 99.9% uptime with zero data breaches
- ✓ 65% faster patient onboarding process
- ✓ Successful integration with 10+ hospital EHR systems
- ✓ 95% user satisfaction rate from healthcare professionals

Sateck – Sfax, Tunisia

City: Sfax | Country: Tunisia

Fullstack Java Developer(Intership)

[01/01/2022 – 01/06/2022]

Full-Stack Development:

- Developed a **management application** using **Angular** for the frontend and **Spring Boot** for the backend, ensuring a seamless user experience.
- Implemented responsive and user-friendly interfaces with Angular Material and TypeScript.

Backend Development:

- Designed and built RESTful APIs with **Spring Boot**, enabling CRUD operations for managing application data.
- Integrated **JPA/Hibernate** with a relational database to manage and persist business data efficiently.

Frontend Development:

- Used **Angular services** to communicate with APIs and manage application state.
- Created reusable components and directives to streamline the development process.

Authentication and Authorization:

- Implemented **JWT-based authentication** to secure APIs and manage user sessions.
- Developed role-based access control to restrict functionality based on user roles.

Reporting Features:

- Generated dynamic reports in PDF format using the **jsPDF library**, allowing users to export and share data.
- Created Excel exports for tabular data to facilitate business analytics.

For Right Solution – Sfax, Turkey

City: Sfax | Country: Turkey

Fullstack Java Developer

[06/06/2022 – 30/12/2022]

- Develop the web application with a complete CRUD (Create, Read, Update & Delete) structure under the MVC architecture
- Designed and implemented microservices using **Spring Boot** and **Spring Cloud**, ensuring high availability and scalability in cloud environments.
- Optimized performance for high-traffic customer-facing web applications by implementing caching (Redis) and asynchronous processing (RabbitMQ).

- Built and maintained REST APIs with **Spring MVC**, following RESTful principles and ensuring secure communication using OAuth 2.0 and JWT.
- Applied design patterns like Singleton, Factory, and Observer to improve code readability and maintainability in enterprise applications.
- Dockerized Java applications and automated CI/CD pipelines using GitLab CI and Jenkins for seamless deployments.
- Built interactive user interfaces using **JavaScript/TypeScript** with frameworks like Angular and React, ensuring seamless API integration.
- Implemented end-to-end solutions, integrating Spring Boot backends with Angular frontends for real-time web applications.
- Practiced **TDD** by writing test cases first using **JUnit** and **Mockito**, achieving 90% test coverage for critical services.
- Utilized Cucumber for feature testing, ensuring alignment with business requirements.

EDUCATION AND TRAINING

Engineering Degree – Computer Science

Enet'com [01/01/2019 – 30/12/2022]

City: Sfax | Country: Tunisia | Website: <https://enetcom.rnu.tn/fr> | Field(s) of study: Information and Communication Technologies: • Software and applications development and analysis | Level in EQF: EQF level 5

LANGUAGE SKILLS

Mother tongue(s): Arabic

Other language(s):

English

LISTENING B1 READING B1 WRITING B1
SPOKEN PRODUCTION B1 SPOKEN INTERACTION B1
